

9. Procurement assistant and supplier quotation comparison

Project

AI supports procurement decisions.

Specific solution

The system reads supplier quotations, contractual terms, price lists and deadlines, then creates a comparison table. It also flags risky terms, differences in warranties and hidden costs.

Functions

- structured quotation comparison;
- highlighting delivery deadlines;
- comparing payment terms;
- flagging contractual risks;
- suggesting alternative suppliers from a database;
- listing negotiation points.

Measurable results

- faster quotation assessment;
- better negotiation preparation;
- fewer overlooked contractual risks;
- procurement savings.

Particularly suitable industries

- manufacturing;
- construction;
- logistics;
- trade;
- food production.
